Randwick Health and Education Precinct

The Randwick Health and Education Precinct is one of the most comprehensive health innovation districts in Australia. Home to children’s, women’s and adult hospitals, a private hospital, globally recognised medical research institutes and a world-leading university.

The precinct delivers life-saving and life-changing world-class healthcare to all, from newborn babies, right through to the elderly. This includes first class medical and nursing services as well as the best in allied health, all in the one location. It also delivers unique specialty services across the state and nationally.

The precinct’s diverse research and education are providing improvements to the care and treatment patients receive and the outcomes they experience.

The precinct’s work in biomedical sciences, robotics, and next generation technologies put it at the forefront of medical innovation in Australia.

Built on a strong academic foundation of health sciences, staff and researchers at Randwick have a long history of collaboration with affiliated universities and research institutions around the world.

Clinicians and researchers work side by side, across the precinct, performing ground-breaking research that continues to transform the personalised care that patients receive.

And all this attracts the very best clinicians and academics from around the world.

The precinct partners are working together to build a healthy and green, connected, integrated and compassionate centre of excellence for healthcare, research and education.

Precinct organisations

The precinct is home to a wide variety of organisations including South Eastern Sydney Local Health District (which covers the following health services – Prince of Wales Hospital, the Royal Hospital for Women and the Eastern Suburbs Mental Health Services), the Sydney Children’s Hospital, Randwick and the Prince of Wales Private Hospital.

The University of New South Wales, Kensington Campus is also within the precinct.

In addition, the precinct hosts the University of Technology, the George Institute for Global Health, the Children’s Cancer Institute, the Bright Alliance, the Kirby Institute, the Black Dog Institute, NeuRA, the Kidman Centre, the Fertility and Research Centre, the National Drug and Alcohol Research Centre, the Centre for Big Data Research in Health, the Centre for Eye Health, Scientia Clinical Research and the Sydney Partnership for Health, Research and Enterprise.

The precinct organisations are working together on a range of important initiatives, including:

• Driving an integrated, clinically driven, approach to precinct planning
• Exploring strengthened partnerships and collaborations in health, research and education
• Addressing transport and access now and in the future
• Designing a healthy, green and welcoming place for staff, patients, families, visitors and the community.
