

## Improving the health and wellbeing of our communities

The NSW Government is investing \$720 million to strengthen the Randwick health and education precinct as a world-leading centre for health and wellbeing, research, education and teaching.

As part of the redevelopment, a new Prince of Wales Hospital Acute Services Building, due for completion in 2022, will provide a range of innovations and improvements that greatly benefit patients, staff and the community.

The Acute Services Building will include:

- Expanded adult emergency department
- Expanded psychiatric emergency care centre
- Expanded intensive care unit
- New rapid assessment unit including a virtual care centre
- Replacement of existing inpatient wards and provision of additional inpatient beds providing contemporary facilities for the following specialties:
  - ◇ Haematology and Oncology
  - ◇ Aged Care (Acute and Sub Acute)
  - ◇ Orthogeriatrics
  - ◇ Respiratory Medicine and Infectious Diseases
- ◇ the Acute Spinal Unit, and
- ◇ a Neurosciences floor that will incorporate an expanded Acute Stroke Unit, Neurology and Neurosurgical beds and the Complex Epilepsy Service.
- Four new digital operating theatres equipped with state-of-the-art technology for neuroscience surgery and complex orthopedics, including major spinal surgery
- A new and expanded central sterilising service department and a new helipad serving the Randwick Hospitals Campus
- Teaching, education and research spaces integrated with clinical areas to support collaborative medical research.

*We are implementing new innovations and technology to improve the care we provide and the overall wellbeing of our community*

## Development Deliverables

### Integrated Patient Journey

The Acute Services Building will facilitate improved coordination of care between the hospital and the community, which will in turn benefit the patient journey.

### Mindfulness to Wellbeing

There will be thoughtful and respectful spaces designated for patients, their families and their carers. These spaces will aim to enhance individual's wellbeing.

### Innovation and Excellence

There will be new digital operating theatres which are fit for emerging intraoperative technology that assists with patient diagnosis and treatment.

### Best-Practice Treating Spaces

Each Inpatient Unit will provide a higher proportion of single rooms, and include best practice fixtures and equipment to improve the patient experience and outcomes.

### Patient Focused Spaces

There will be therapeutic spaces that patients will have priority access to. This will help patients feel more comfortable during their stay in hospital.

### Fit for Purpose

The Acute Service Building will provide improved support for clinical care, patient privacy and patient visibility which better aligns with contemporary models of care.

### Population Based Care

There will be more treatment spaces and resuscitation bays which address population demands for now and in the future.

### Making it Modern

The Acute Services Building will be a world-class building with modern facilities that will greatly benefit staff and visitors.

### Latest and Greatest

The Acute Services Building will be home to state-of-the-art information technology and clinical equipment which will enhance patient outcomes.

### Leading the Way

The Acute Services Building will support seamless integration between academic research and clinical innovation that will optimise service delivery and patient care.
