

Construction starting soon on new End of Trip facility

Construction will soon commence on a new End of Trip facility, to support staff riding, running and walking to work at the Randwick Hospitals Campus.

Scheduling works

Site establishment for the new End of Trip facility will commence in late November 2021, with the installation of hoardings and water filled barriers around the site compound in the carpark.

Construction activities will include:

- removal of existing structures that will involve a limited amount of saw cutting and jackhammering
- constructing a new public entry adjacent to the B3 vehicle entry
- infill of the concrete slab between Levels B3 and B4
- services installations and internal fit out works.

At times, traffic control may be in place to manage construction activity.

Site location

The site compound will be located inside the carpark, to the right of the vehicle entry. Public parking will still be available on this level and across the campus carpark for staff, visitors and patients.

When it opens in 2022, the new facility will support a growing number of staff walking and riding into work each day!

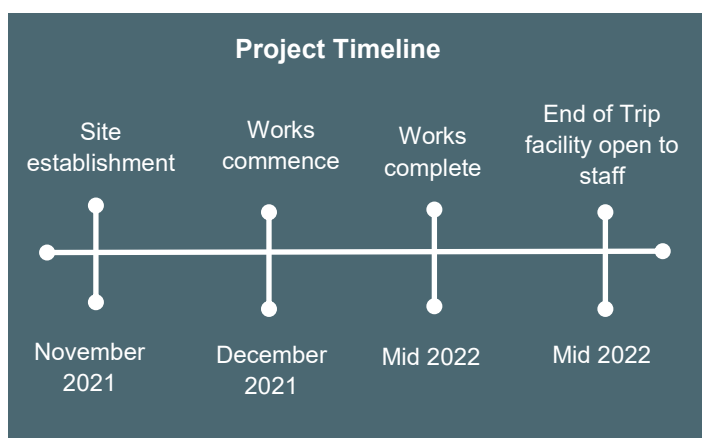

Managing construction activity

Staff, patient and community amenity and safety is our highest priority.

The Randwick Campus Redevelopment complies with strict environmental and planning controls. During construction we are committed to minimising disturbances to staff, neighbours and local community.

Measures to manage noise, dust and vibration will be implemented for the duration of works.

Construction activity will occur during standard construction hours except out of hours works are required to support hospital operational continuity.

About the End of Trip facility

Set to transform the experience of staff riding, walking and running to work, the facility will deliver a range of accessible and modern amenities including showers, change rooms, secure lockers and bike racks.

Located on Level B3 of the campus carpark and accessible from Hospital Road, staff will enjoy a quick and seamless journey from the End of Trip facility to the Barker Street entrance via the carpark lifts.

Opening in mid-2022, the End of Trip facility is a key initiative of the Randwick Campus Redevelopment Green Travel Plan that seeks to reduce staff driving to work and encourage uptake of alternative transport options.

Riding, walking and running has numerous health benefits, improves wellbeing and is an environmentally friendly travel mode, with the End of Trip facility making the transition into active transport easy.

The End of Trip facility will include:

- change rooms, showers and toilets
- 80 secure lockers
- approximately 200 secure bike racks, including vertical and horizontal racks to accommodate a range of bikes
- bike repair station and lock storage
- airing cupboards, irons and hairdryers.

Access and security

Staff safety has been a key priority in the design of the Randwick Hospitals Campus End of Trip facility to ensure it is safe for staff to access at all times.

Security features include:

- 24/7 CCTV
- entryway with swipe card access
- external and internal lightning arrangements
- secure bike racks and lockers.

Staying Informed

We are committed to providing regular consultation updates to local and affected stakeholders. Construction notices are published on our webpage at randwickcampusredevelopment.nsw.gov.au

Contact Us

You can email the project team at randwickcampusredevelopment@health.nsw.gov.au or call 1800 571 866.

Thank you for your patience as we undertake this important work.
