

Construction activities continue on-site for the Prince of Wales Hospital Integrated Acute Services Building; the first stage of the Randwick Campus Redevelopment and the catalyst project for expanding the world-class health, research and education facilities at the Randwick precinct.

October construction activities

Key Construction activities include:

- Concrete structural works
- Installation of perimeter screens
- Bulk excavation and road pavement works along Hospital Road
- A new fire booster installation
- Temporary closure of the B2 car park continues

Service investigations continue along Hospital Road south, between Magill and Barker Streets, to identify underground service locations and inform planned upgrades.

Preparation works are underway to support the construction of a bulk oxygen store on Francis Martin Drive, adjacent to the Hospital Car Park.

Single lane closures will be in place along Hospital Road south and Francis Martin Drive, and emergency access maintained under the support of traffic control.

Construction hours

All activities are scheduled during approved site hours - **Monday to Friday 6am - 10pm and Saturday 7am - 5pm.**

Specific works may be conducted outside of these construction hours to ensure the safety of workers, pedestrians, cyclists and motorists, and to minimise impacts to traffic and hospital access, and will be notified accordingly. Activities are dependent on weather and site conditions and are subject to change.

The extended working hours, facilitated by a NSW Government Planning Order, have been extended until late-March 2021 and is subject to further review.

Minimising construction impacts

We are committed to minimising the impact of our works where we can. All construction activities are carried out with the health and safety of the local community as our top priority. We endeavour to keep noise, dust and vibration to a minimum. Some ways we do this include:

- truck minimisation periods during peak times to maintain traffic flow into the car parks from Hospital Road
- traffic control and safety exclusion zones established to ensure worker, pedestrian, vehicle and cyclist safety
- mitigation measures in place to manage light spill, dust, noise and vibration
- noise, dust and vibration monitoring devices in use 24 hours per day, 7 days per week
- conducting high impact works during standard hours with respite periods during rock-breaking activities
- coordinating works to ensure hospital operations continuity.

We thank you for your patience while we expand our world-class health, research and education facilities.

Construction worker and community safety
No.1 priority

Monitoring health and COVID-19 symptoms

Good personal hygiene practice and requirements

Maintaining social distancing in and around site

Worker segregation and contact record keeping

Extended site work hours and altered work schedules

Increased cleaning and sanitation regimes

The health and safety of Hospital staff, families, visitors, construction workers and the local community remains our top priority.

We encourage you to get in touch if you have any questions or feedback:
