

## Botany Street signalised intersection works

### Overview

The Randwick Campus Redevelopment will deliver a new four-way signalised intersection on Botany Street, Randwick.

Once complete, the intersection will provide safe pedestrian and vehicle access to the Prince of Wales Hospital Acute Services Building, future Sydney Children's Hospital Stage 1 and Minderoo Children's Comprehensive Cancer Centre, UNSW Health Translation Hub and UNSW Kensington Campus.

The traffic signals will be located on Botany Street between High Street and Magill Street at UNSW Gate 11 and Library Walk.

Construction will commence in late August and is expected to take approximately 4 months to complete, subject to weather and unforeseen circumstances.

Construction activities include:

- Excavation, trenching and general roadworks
- Rock-breaking and removal of old concrete kerbs, gutters and pedestrian islands
- Services relocations and upgrades
- Installation of traffic control signals, conduits and upgrades to the public domain including footpaths and road pavement on Botany Street.
- Asphaltting and line marking.

### Work hours and program

Approved standard construction working hours are:

- 7am to 6pm, Monday to Friday
- 8am to 5pm, Saturday

For traffic and safety reasons and due to the proximity to the Randwick Health Campus and UNSW Kensington Campus, night and weekend works are required to safely undertake the works.

Roadworks on this important arterial road can only occur at times approved under the Road Occupancy Licence issued by Transport for NSW and the out of hours approval issued by the Department of Planning and Environment.

Out of hours work are approved to occur:

- Up to four nights per week from 6pm to 6am (no work on Saturday nights), and
- Over three weekends during extended weekend hours from 8am to 10pm Saturday and Sunday.

Any two consecutive nights of work will be followed by a respite night.

Where possible, disruptive activities will be scheduled as early in the evening as possible.

Respite will be provided in accordance with the out of hours approval issued by the Department of Planning and Environment.

Work by Authorities such as Jemena Gas and Randwick City Council may occur in the local area under separate approvals.

### Getting in touch

We encourage you to contact us if you have any questions, feedback or complaints:

- by telephone on 1800 571 866 (24hrs)

### Maintaining access to UNSW Kensington Campus at Gate 11

We are working closely with UNSW Sydney to minimise any impacts to emergency and delivery services, staff, students and visitors throughout the works.

Access at Gate 11 to the UNSW campus carpark and for service and emergency vehicles will be maintained at all times.

Traffic control will be in place to manage pedestrian and vehicular safety during night works when lane closures and varied traffic arrangements will be in place.

Plan of the Botany Street signalised intersection upgrade

### Managing the works

Pedestrian and vehicular access will be maintained at all times through traffic control and local diversions. Signage will be installed to provide information to pedestrians and road users.

The Randwick Campus Redevelopment complies with strict environmental and planning controls. We are committed to minimising disturbance to our neighbours and local community.

A range of dust, noise and vibration measures will be in place to minimise impacts including:

- Noise monitoring and reporting
- Scheduling of high impact works
- Work methods that mitigate noise, dust and vibration
- Wetting down of the work area for dust generating activities
- Respite periods for night works

Waterfilled barriers and temporary fencing will safely separate the work site from the general public whilst works are taking place.

### Activating the new signals

Construction work is expected to be complete by late 2022 and the new signals will be activated prior to the opening of the new Prince of Wales Hospital Acute Services Building.

Transport for NSW will manage signal timings to provide access to the Hospital, UNSW and surrounding local area.

### Stay updated

Ongoing updates via letterbox drops and phone calls will be provided to keep affected stakeholders and residents informed.

We are working closely with the Randwick Health Campus, Emergency Services, UNSW Sydney, Transport for NSW, and Randwick City Council to coordinate construction activities in and around the Randwick Health & Innovation Precinct.

*We thank you for your patience while we progress these important works.*
