## Randwick Campus Redevelopment

---

February 2025

---

### Ongoing construction activity during 2025 – Prince of Wales Hospital

Following the completion of initial demolition works, construction activity to complete the Prince of Wales Hospital refurbishment works program being delivered as part of the Randwick Campus Redevelopment project will continue throughout 2025.

#### **Construction activity will be underway through to October within the following areas:**

- Level 3, Building 13, Campus Centre – future Central Equipment Store
- Level 0, Building 15, Dickinson Building former Emergency Department – future Haemodialysis / Nephrology Outpatient Unit
- Level 0, Building 15A, Dickinson Building former PECC – future Security Services and PoWH on-call rooms

Alongside the refurbishment works program, construction activity to deliver the future Acute Services Operating Suite on Level 1 of the Acute Services Building (ASB) will also continue throughout the year.

#### **Approved construction hours are 7am to 5pm, Monday to Friday.**

Works include the installation of essential services and internal fit-out activities such as wall construction and the installation of ceilings, flooring and fixtures.

While all activities will be carried out with the health and safety of campus stakeholders and users as our top priority, localised noise impacts are expected during construction activities.

To maintain safe work practices and support hospital campus continuity of operations, a range of mitigation measures are in place to minimise construction impacts, including:

- use of equipment designed to reduce noise and vibration
- sealed perimeter hoarding to contain noise and dust
- sticky mats to minimise dust spread
- installation of dust monitoring equipment
- compliance with noise and vibration management standards.

During these works, **public and staff lifts** within the ASB and Campus Centre will be intermittently used to support construction worker access to spaces, resulting in occasional delay.

Any high impact construction activity will be communicated to key stakeholders prior to commencement.

If you have concerns or unexpected impacts to report, please contact your line manager in the first instance.

For further information regarding the ongoing Prince of Wales Hospital construction works, please refer to the [latest fact sheet](#).

Thank you for your patience as we progress this important program of work.
