

**Notification of works –  
contractor site shed removal activities,  
Thursday 29 August 2024**

As part of completion works for the UNSW Integrated Acute Services Building project, associated site sheds and storage compounds will be removed on Thursday 29 August between 7am and 6pm.

**Demobilisation activities will include a number of heavy vehicle movements along Hospital Road between 10am and 3pm to enable the removal of site sheds.**

Heavy vehicles will enter the site from Barker Street under traffic control, reverse along Hospital Road to access the work compound area and have site sheds loaded on, then leave the site in a forward direction via Hospital Road onto Barker Street.

All reversing vehicles will be escorted by traffic controllers stationed at each Hospital Road intersection to support safe flow of vehicles travelling within the campus.

These works may result in minor noise impacts from reversing vehicles, along with the loading of equipment and materials.

Pedestrian and emergency vehicle access to the hospital will be maintained at all times.

Access to the Prince of Wales Hospital Emergency Department from Magill Street, via Botany Street, will not be impacted.

While there may be temporary delays to traffic flow as transportation vehicles reverse along Hospital Road, there will be minimal impact to hospital loading dock and car park access.

The temporary construction fencing and mobile traffic lights on Hospital Road will be removed as part of these works, re-opening the section of Hospital Road north of Magill Street to two-way traffic.

This reinstatement of traffic conditions will support ongoing hospital operational activity, as well as construction vehicle access to the Sydney Children's Hospital Stage 1 and Minderoo Children's Comprehensive Cancer Centre (SCH1/MCCCC) site.

For any questions or concerns about this work, please contact the project team via the details below.

*Please note that site shed removal may be impacted by inclement weather, requiring the postponement or rescheduling of planned activities. Any date change will be notified as soon as practicable.*
